## Table of contents

<b>Preface</b>	<b>7</b>
<b>1 Introduction</b>	<b>9</b>
1.1 Soaring flight and meteorology . . . . .	9
1.2 Mountain waves . . . . .	10
<b>2 Forces and motion</b>	<b>13</b>
2.1 Some formalities . . . . .	13
2.2 Gravity force . . . . .	14
2.3 Pressure Forces . . . . .	16
2.4 Hydrostatic Pressure . . . . .	17
2.5 Dynamic pressure . . . . .	19
2.6 Mass conservation and continuity principle . . . . .	19
<b>3 Archimedes' principle and buoyancy forces</b>	<b>23</b>
3.1 Archimedes forces . . . . .	23
3.2 Stratified fluids . . . . .	24
3.3 Archimedes' principle in a stratified fluid . . . . .	25
3.4 Oscillations in a stratified fluid . . . . .	26
3.5 Stratification and Archimedes' principle in the atmosphere . . . . .	28
<b>4 Waves</b>	<b>33</b>
4.1 General wave properties . . . . .	33
4.2 Transversal and longitudinal waves . . . . .	34
4.3 Stationary and standing waves . . . . .	35
4.4 Water waves . . . . .	35
4.5 "Water waves" in the atmosphere . . . . .	39
<b>5 Internal gravity waves</b>	<b>41</b>
5.1 Waves in unbounded domains . . . . .	41
5.2 Forced gravity waves . . . . .	44
5.3 Gravity waves restricted by horizontal boundaries . . . . .	46
5.4 Gravity waves with a background wind . . . . .	48
5.5 Triggering gravity waves . . . . .	50
5.6 Forces driving internal gravity waves . . . . .	52
5.7 Gravity waves driven by hydrostatic pressure forces . . . . .	57
<b>6 Gravity waves forced by topography</b>	<b>63</b>
6.1 The Scorer parameter . . . . .	63
6.2 Gravity waves induced by periodic terrain . . . . .	64

6.3	Scorer parameter variable with height . . . . .	67
<b>7</b>	<b>Mountain waves</b>	<b>69</b>
7.1	Some general aspects . . . . .	69
7.2	Vertically propagating mountain waves . . . . .	71
7.3	Trapped mountain waves (lee waves) . . . . .	72
7.4	Wave properties of interest for soaring flight . . . . .	73
7.5	Mountain waves as hazards to aviation . . . . .	80
<b>8</b>	<b>Forecasting mountain waves</b>	<b>83</b>
8.1	General considerations . . . . .	83
8.2	Empirical methods . . . . .	83
8.3	Linear wave models . . . . .	86
8.4	Nonlinear numerical models . . . . .	87
8.5	Operational weather prediction models . . . . .	88
8.6	Verification of mountain wave forecasts . . . . .	90
<b>9</b>	<b>Rotors</b>	<b>93</b>
9.1	General aspects . . . . .	93
9.2	Rotor structure . . . . .	94
9.3	Rotor formation . . . . .	96
<b>10</b>	<b>Travelling gravity waves</b>	<b>99</b>
10.1	Introduction . . . . .	99
10.2	Thermal waves . . . . .	99
10.3	Solitary waves . . . . .	101
<b>11</b>	<b>A short history of mountain wave soaring</b>	<b>105</b>
	<b>Appendix</b>	<b>109</b>
	<b>References (print and internet)</b>	<b>115</b>
	Books and scientific papers . . . . .	115
	Internet sources . . . . .	118
